EDUCATION

Cal Poly Humboldt | BS Mechanical Engineering | Expected Spring 2027

ENGINEERING EXPERIENCE

Change Technologies | Co-Founder & Engineering Lead | Jan 2023–Present

- Develop sodium-ion motorcycle and battery-pack concepts, including parametric cylindrical-cell packaging, enclosure and cooling iterations in Fusion.
- Collaborated with Aubrey Cooper on a motorcycle pitch recognized with first place at Grow Tech Fest 2025.

Everkin LLC | Head of Engineering, Design & Procurement | May 2026–Present

- Develop electronics and product designs, including a 2.4 GHz radio concept and a PCB design ordered for fabrication; coordinate with manufacturers.

SHN Consulting Engineers & Geologists | Laboratory Materials Tester | May 2025–May 2026

- Performed concrete compressive-strength testing and redesigned spreadsheet workflows to support ASTM-aligned reporting and reduce manual work.

Humboldt County | Engineering Aide | May–Nov 2023

- Conducted materials laboratory tests, assessed data against California Test Methods, and improved recording spreadsheets for public works staff.

SELECTED TECHNICAL PROJECTS

- Built a three-axis CNC machine; developed a Python thermal-management simulation and interactive physics learning tools.

TECHNICAL SKILLS

Parametric CAD and assemblies • Fusion • PCB design • Python • Excel • 3D printing • Welding • Materials testing • Technical documentation • Manufacturer communication

ADDITIONAL

Conversational French; written Mandarin for manufacturer communication. Additional projects, technical details and visual work are available in the portfolio above.
