Memo

- To: Lonny Grafman
- From: Hupods - Stephanie Barajas, Aubrey Cooper, Kaden Smith, Chanelle Vaillancourt
- Date: 10/08/2024
- Subject: Section 2 - Problem Analysis Submission

Purpose

The purpose of this document is to submit Section 2 of the Hupods Trophy Project, focusing on the Problem Analysis. This section outlines the specific requirements, considerations, criteria, and constraints that inform the design and development of the project's unique trophy.

Discussion

Section 2 outlines the foundational elements guiding the Hupods Behavioral, Social Sciences, and Public Administration Trophy Design. The **Specifications** define key project requirements, including client expectations, location relevance, budget limits, and size constraints. **Considerations** cover broader design factors such as weight, travel-friendliness, public appeal, and the representation of Cal Poly Humboldt's values and the CSU competitors' accomplishments. The **Criteria and Constraints** establish measurable goals for cost, aesthetics, safety, durability, and intuitive usability, ensuring the trophy meets both functional and symbolic needs. Lastly, **Usage and Production Volume** highlights that the trophies are bespoke items intended for single-use events, designed to inspire and engage a diverse audience while ensuring safety and accessibility.

Recommendation

We seek your constructive feedback and evaluation of Section 2, specifically the depth, clarity, and quality of the Problem Analysis content. Your insights on whether the outlined specifications, considerations, and criteria effectively frame the project requirements are greatly appreciated.

2.1 Problem Analysis

The problem analysis breaks down the precise needs and challenges into key specifications, considerations, criteria, constraints, and usage.

2.1.1 Specification

In a design project, specifications are detailed requirements that outline the features, performance, constraints, and standards that the final product must meet. For the Hupods BSSPA Trophy design the specifications include:

- Representative of BSSPA category
- Award category must be displayed
- Dimensions may not exceed 1 ft. x 1 ft. x 1 ft.
- Lasts a lifetime, assuming it's on shelf/desk for display
- Interactive element
- Trophy's elements must be TSA friendly
- Budget for trophies is strictly $500

2.1.2 Considerations

Considerations are aspects that should be looked upon carefully. Many important topics need to be taken into consideration during the process of designing the trophies Here are the important few.

- Weight - will be held by the awards recipients on stage, setting a minimum of 5-7 lbs
- Travel friendliness - designed to be easily portable, lightweight, and compact; a customized box fitted to the trophies is an option to consider
- Public interest - to captivate the audience, great consideration to evoke feelings of excitement, admiration, and sublimity
- CSU's Graduates and undergraduate BSS competitors - representing them in their accomplishments in the design of both trophies
- Representation of Cal Poly Humboldt values - taking into account of academic freedom, the vast forests, ecosystems, coasts, and our school mascot, the Lumberjack

2.1.3 Criteria and Constraints

Criteria	**Constraints**	**Weight (1-10)**
Cost	$\leq$ $ 500	(tbd)
Aesthetic	Survey: Example Trophies/ Sculptures	(tbd)
Safety	TSA Guidelines	(tbd)

Durability	Lifetime Display/Use	(tbd)
Intuitive UI	Accessibility	(tbd)

2.1.4 Usage and Production Volume

The trophies are intended as decorative elements appealing to scholars of all ages, particularly California State University students. While the intent is for usage by an educated demographic, a consideration must be made towards the intuitive aspect for people of all ages, ensuring everyone inspired by the object uses it safely. Therefore the aim is for a high level of user intuitiveness, prioritizing safety, and reducing the possibility of misuse across all age groups, thus minimizing potential damage. These are single batch products; Trophies that are one of a kind, not intended for production.
